SDG1: No Poverty

1.4.3 - Does your university as a body organise training or programmes to improve access to basic services for all?

Alnoor University conduct many events through its faculties, departments, councils, trade unions and youth organization for creating awareness among students, teachers, staff, and local community about health, sanitation, drinking water, electricity, maternity, and child mortality etc. In 2023, more than 10 events were conducted for creating awareness among students, staff and nearby communities. These events were dominated by the hunger and its impacts on life of a person or group of people, having low income. It is evident that the Government of Republic of Iraq revised its policy of poverty from time to time. These policies are prepared to define the targets of poverty eradication from all spheres of society. On the contrary, Alnoor University creates a diverse opinion on different issues and problems attributed to poverty in the country. In this way, we not only create awareness among Iraqi citizens but also leverage the government by providing the international opinions about hunger and its consequences. This serves them meaningful ideas and solutions to incorporate in the policies to remove the hunger and providing access a nutritious food to all.

In light of the great keenness of Al-Noor University College to highlight the methods available to it to provide field services to the people in its home environment, and to expand the volume of services whenever possible, it is also keen to perpetuate this positive openness to society, therefore, educational dental clinics continue to provide advisory, preventive, and therapeutic services to families in support of providing advanced stage students with experience, enhancing the experiences of their professors, and providing the treatment or medical intervention needed by those suffering from dental problems.

"Al-Noor University, in partnership with the Iraqi Ministry of Transport and Beitna Foundation, announces the launch of the first tourist bus in Mosul for sightseeing and exploring the city's tourist and historical landmarks. The media office at Al-Noor University stated that the idea of the tourist bus is a global concept but being implemented for the first time in Iraq, starting from Nineveh."
