## **SDG6: Clean Water and Sanitation**

6.3.2 - Does your university as a body have processes to prevent polluted water entering the water system, including pollution caused by accidents and incidents at the university?

Sewage Disposal (Alnoor University, Iraq)

## **Description:**

Sewerage undertakers in the Republic of Iraq have a duty under the Water Industry Act 2013 to provide, improve and extend a system of public sewers for both domestic and trade flows. They have a duty to cleanse and maintain those sewers and any lateral drain to ensure that the area that they serve is effectively drained. There is also a duty to make provision for the emptying of those sewers, normally through sewage treatment works, or where appropriate, through discharges direct to watercourses. Where this water is taking to recycl it through spacial factory runs by the government.

When preparing meals, Imam Ja'afar Al-Sadiq University implements a standardized production procedure that makes efficient use of the materials and decreases serving sizes to guarantee that students may eat all of their food while minimizing wastage. For instance, by giving the student a large tray on which to place his meal, he is forced to select a smaller amount of food that he can hold in his hands and consume entirely rather than loading the tray with a quantity of food that he cannot finish.
