Climate Action

13 CLIMATE ACTION

No country in the world is immune to the serious effects of climate change. Greenhouse gas emissions continue to rise and are now 50 percent higher than their levels in 1990. Moreover, global warming is causing long-term changes to our climate system, threatening irreversible consequences if we do not take necessary mitigation and adaptation actions today.

Climate Action

College of Health and Medical Technologies

Dr. Hana Ihsan Hasan Al-Baroudi, Head of the Radiology Techniques Department at the College of Health and Medical Technologies, Alnoor University, was hosted to speak about the causes and impacts of climate change during a scientific dialogue session. The session was organized in collaboration between the Kasnazan Cultural Council in Nineveh and the Forum of Youth Foundation for Cultural and Sports Development in Nineveh. Dr. Al-Baroudi presented the main causes of climate change, its consequences, desertification, global warming, and methods to mitigate environmental pollution and climate change.
