

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

College of Health and Medical Technologies

Alnoor University has equipped the laboratories of the Medical Laboratory Technology Department in the College of Health and Medical Technologies with two advanced devices. The first is a hormone and tumor marker measurement device of the Maglomi type, a high-quality and state-of-the-art instrument that has been tested in numerous hospitals and private laboratories across Iraq. It provides technology aligned with the requirements of the updated curricula in clinical chemistry, and students will begin training on it starting next semester. The second device is a Complete Blood Count (CBC) analyzer, which provides all blood-related measurements pertinent to hematology. It has been installed in the Hematology Laboratory to train the department's students.
