

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

Alnoor University is taking steps toward aligning itself with prestigious global universities, strengthening its role as a well-established Iraqi institution. This is achieved by expanding its academic and student communities through the admission of Arab and international students, in line with the initiative of the Honorable Minister of Higher Education and Scientific Research, “Study in Iraq.” Additionally, the university employs faculty members from outside Iraq to foster interaction between diverse expertise. One of the Arab students is Abrar Abdulrahman Mohamed Al-Zain Mohamed Saleh, a Sudanese student who was accepted under the free scholarship program in her first year in the Medical Laboratory Technology Department of the College of Health and Medical Technologies at the university. She was welcomed, guided, and provided with the necessary resources and facilities to help her focus on her studies upon her arrival.
