

Sustainable Development Goals

Industry, Innovation and Infrastructure

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

A comprehensive and sustainable approach to manufacturing, alongside innovation and infrastructure, can unleash dynamic and competitive economic forces that generate job opportunities and income. It plays a key role in introducing and advancing new technologies, facilitating international trade, and enabling the efficient use of resources. However, the world still has a long way to go to fully realize these potentials. In particular, the least developed countries need to accelerate the development of their manufacturing sectors if they wish to achieve the 2030 goals and increase investment in scientific research and innovation.

College of Dentistry

The College of Dentistry at Alnoor University held a specialized workshop supervised and presented by Professor Dr. Talal Hamid Al-Salman, the Dean of the Faculty. He provided an overview of the main causes leading to hypersensitivity to composite light-cured fillings, the effective ways to prevent it, and the methods for managing it if it occurs.
