Sustainable Development Goals

Quality Education

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

As part of an early introduction to university life and the study system in the higher education sector, Maryam Al-Adhraa High School organized an orientation visit for its sixth preparatory grade students to Alnoor University. The visit began with a bouquet of flowers presented by the high school to Alnoor University, which was received by Assistant Professor Dr. Ismail Abdul Wahab, the university's Assistant President for Scientific Affairs, from the school principal. After that, a tour was organized, during which the students explored the scientific college laboratories, lecture halls, and visited the educational dental clinics, as well as learned about modern equipment and technologies.
