

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

College of Education

In the presence of Professor Dr. Yassin Taha Al-Hajjar, President of Alnoor University, and as part of the university's ongoing efforts to enhance students' research skills, the Department of Arabic Language at the College of Education held the final thesis discussions for fourth-year students. These projects represent a core academic requirement for graduation. The theses covered a range of distinguished topics in linguistics, literature, criticism, rhetoric, and language studies. Throughout the discussions, students demonstrated an advanced level of understanding and academic proficiency, as well as the ability to apply research methodologies in a systematic and organized manner. These projects provided students with a valuable opportunity to gain early research experience, familiarizing them with the steps of academic writing, documentation techniques, analytical approaches, and presentation skills, as well as defending their ideas before academic committees. This process plays a crucial role in preparing students for the job market and postgraduate studies, while fostering their abilities in critical thinking and academic independence.
