

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

College of Arts

As part of scientific collaboration and academic development, the Department of Translation in the College of Arts, in coordination with the Department of English Language in the College of Education at Alnoor University, organized a scientific visit to the IELTS Testing Center at the University of Mosul. The visit aimed to introduce students to the IELTS international testing system, its components, and the registration process, as well as to highlight the significance of the test in both academic and professional careers. The visit included a tour of the center's facilities and an interactive session with the specialized staff, focusing on the required language skills and optimal preparation strategies for the exam. Students showed great engagement and interest in the information presented and expressed how beneficial the experience was in raising their awareness of the importance of international language proficiency exams in the fields of translation and education. This visit is part of a series of scientific activities organized by both departments to support student skill development and broaden their academic and practical horizons.
