

# Sustainable Development Goals

## Quality Education

### 4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

### College of Arts

Students from the Department of Archaeological Tourism carried out their first field initiative, which involved the design and installation of informational panels for the mural of the "Royal Chariot of the Assyrian King Tiglath-Pileser III," located at the entrance of the Al-Manqousha Bath near the Baytna Foundation for Culture, Arts, and Heritage in Old Mosul. As part of the initiative, the students wrote and translated the descriptive texts into English, in addition to designing and artistically installing the panels in a manner befitting the significance of the mural, which stands as a prominent testament to the Assyrian civilization in Nineveh. This initiative reflects the students' efforts to raise community awareness about the importance of heritage landmarks and to bridge academic knowledge with practical, field-based application — contributing to the preservation of the city's cultural and historical identity.
