Reduced Inequalities

10 REDUCED INEQUALITIES

Global inequality is increasing, with 1% of the world's population holding nearly half of the global wealth. Goal 10 of the Sustainable Development Goals aims to ensure equal opportunities by adopting legislation and following policies that improve living conditions for everyone in a sustainable manner. Special attention must be given to the most vulnerable countries, such as the least developed countries and small island developing states, particularly through directing financial flows to them.

Reduced Inequalities

In a humanitarian gesture that reflects the true values of education and citizenship, the Chairman of the Board of Trustees of Alnoor University paid a special visit to the Mosul Center for Persons with Disabilities. In a move that demonstrates Alnoor University's deep commitment to supporting community initiatives, the Chairman announced the provision of ongoing financial and moral support to the center, affirming that the university will be a true partner in developing the center's services and enhancing its capabilities, in a way that contributes to creating a more compassionate and inclusive environment for children with disabilities. This initiative comes as part of Alnoor University's vision to uphold the principle of social responsibility and to strengthen the role of educational institutions in building a cohesive society that leaves no one behind.
