

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

College of Health and Medical Technologies

Graduation research discussions for fourth-year students were held in the Department of Optical Techniques at the College of Health and Medical Technologies at Alnoor University. The students defended their research projects, which are a requirement for obtaining a bachelor's degree in Optical Techniques. This process serves as an early training opportunity, guiding them onto the right path for engaging in scientific research within their field of specialization in the future.
