Climate Action

13 CLIMATE ACTION

No country in the world is immune to the serious effects of climate change. Greenhouse gas emissions continue to rise and are now 50 percent higher than their levels in 1990. Moreover, global warming is causing long-term changes to our climate system, threatening irreversible consequences if we do not take necessary mitigation and adaptation actions today.

Climate Action

Dr. Bashar Mahmoud Ali, Chairman of the Board of Trustees at Alnoor University and a member of the Iraqi Green Education Association affiliated with the Ministry of Higher Education and Scientific Research, participated in the activities of the International Conference on Sustainable Systems Development (ICSSD 2025), held in the city of Erbil. The conference was organized by the Academic and Research Services (CARES) foundation and brought together a distinguished group of academics, researchers, and international experts who discussed the latest trends and technologies in the fields of sustainability, climate action, energy, water, and sustainable infrastructure. Dr. Bashar Mahmoud Ali's participation reflects Alnoor University's commitment to strengthening its presence in international scientific forums and supporting research and initiatives aimed at achieving the Sustainable Development Goals, in line with a responsible scientific vision that serves both the environment and society.
