

# Sustainable Development Goals

## Quality Education

### 4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

## Quality Education

Lecturer Dr. Mohammed Abdul Jabbar Yahya, Director of the Student Activities Department at Alnoor University, participated in an international developmental program for directors of student activities departments, held at the Peoples' Friendship University of Russia in the Russian Federation. This participation comes as part of Alnoor University's commitment to enhancing the competencies of its administrative and academic staff, and to opening up to international experiences in developing student affairs and university activities. The program served as a fruitful opportunity to exchange expertise and to learn about the latest administrative practices adopted by leading universities worldwide, contributing to the improvement of operational mechanisms within the university and the support of students and their activities. A total of 45 participants representing 38 public and private universities took part in the program. The opening ceremony was attended by official governmental and parliamentary figures from both countries, as well as Olympic athletes and directors of sports and media institutions. The program included several lectures covering both theoretical and practical aspects, the formation of working groups, panel discussions, and field visits to selected sports facilities. This initiative aligns with the vision of the Ministry of Higher Education and Scientific Research, which emphasizes the importance of fostering diverse student activities and keeping pace with advanced global experiences in order to create an enabling university environment for all students across various disciplines.
