

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

College of Arts

In line with its academic mission of integrating theoretical education with practical application, and its commitment to preparing students with solid field experience, Alnoor University dispatched students from the Department of Archaeological Tourism at the College of Arts, in collaboration with the Lamassu Cultural Organization, on a scientific field trip to Turkey. The trip included visits to several archaeological landmarks and cultural heritage sites, providing students with the opportunity to directly engage with various patterns of civilizations and the ways societies have shaped their environments throughout history. This initiative reflects the university's commitment to broadening the intellectual horizons of its students and enabling them to combine academic study with practical experience, in service of both knowledge and society.
