## Sustainable Cities and Communities

### 11 SUSTAINABLE CITIES AND COMMUNITIES

Cities are hubs for ideas, trade, culture, science, production, social development, and other human activities. They play a crucial role in enabling people to achieve social and economic advancement. It is essential to mobilize support to ensure that policymakers are convinced of the need to include access to information in national and regional development plans.

As part of its pioneering role in supporting the sports movement in Nineveh, and in its commitment to highlighting and developing athletic talent, Alnoor University today held a special ceremony to honor the individual sports athletes of Mosul Sports Club who have achieved distinguished accomplishments at both the local and national levels. The ceremony included the presentation of shields and certificates of appreciation to the outstanding athletes, as an expression of the university's pride in their achievements that contribute to elevating the name of the city. During the event, the provisions of the previously signed cooperation agreement between the university and the club were reiterated, which stipulate granting free study seats in the university's colleges to athletes in both individual and team sports who are officially listed on the club's rosters, in accordance with the established regulations. Through this tribute, Alnoor University reaffirms its ongoing support for the sports movement in Mosul and its belief in the importance of integrating education and sports to build an aware and outstanding generation.
