Sustainable Cities and Communities

11 SUSTAINABLE CITIES AND COMMUNITIES

Cities are hubs for ideas, trade, culture, science, production, social development, and other human activities. They play a crucial role in enabling people to achieve social and economic advancement. It is essential to mobilize support to ensure that policymakers are convinced of the need to include access to information in national and regional development plans.

As part of its scientific and cultural mission aimed at preserving heritage and showcasing it through the latest technologies, Alnoor University, in collaboration with Q Lab Company and under the patronage of Baytna Foundation (the cultural front of the university), inaugurated the Printed Memory Museum in Nineveh. The museum is the first of its kind in Iraq, featuring models and exhibits that document the most prominent historical and civilizational landmarks of Nineveh using 3D printing technology. It represents a unique blend of academic knowledge and technological innovation, with the goal of preserving the city's collective memory and ensuring the sustainability of its heritage for future generations. This initiative reinforces Alnoor University's pioneering role in community service, linking the city's rich past with a bright future. The Printed Memory Museum... Alnoor University's initiative to preserve the civilization of Nineveh.
