### 9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

A comprehensive and sustainable approach to manufacturing, alongside innovation and infrastructure, can unleash dynamic and competitive economic forces that generate job opportunities and income. It plays a key role in introducing and advancing new technologies, facilitating international trade, and enabling the efficient use of resources. However, the world still has a long way to go to fully realize these potentials. In particular, the least developed countries need to accelerate the development of their manufacturing sectors if they wish to achieve the 2030 goals and increase investment in scientific research and innovation.

### College of Pharmacy

Professor Dr. Shaker Mahmoud Saeed, Assistant Dean of the College of Pharmacy for Scientific Affairs at Alnoor University, participated as a member of the examination committee for the doctoral dissertation submitted by the student Amer Younis Othman to the Department of Chemistry at the College of Education for Pure Sciences – University of Mosul, entitled: *(Synthesis and Characterization of Some Heterocyclic Compounds Using Certain Catalysts – Nanocatalysts – and Evaluation of Their Biological Activity)*. The defense was attended by a number of professors, researchers, and postgraduate students, and featured scientific insights and research contributions that enriched the discussion and helped evaluate the dissertation in line with the requirements of rigorous scientific research.
