

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

College of Arts

Alnoor University concluded a training course entitled “Fundamentals of Photoshop and Graphic Design,” which spanned seven intensive training sessions. The course was delivered by designer Hassan Hosni Naif, a student in the Department of Archaeological Tourism – College of Arts. During the course, participants received valuable information on the fundamentals of graphic design, learned about the main tools, different image formats, as well as the various types of designs and their multiple applications. The program also included intensive practical exercises that enabled students to design their own logos and acquire hands-on skills in using the tools, while strengthening theoretical knowledge in parallel with practical application, and delving into diverse fields of graphic design arts.
