Sustainable Development Goals
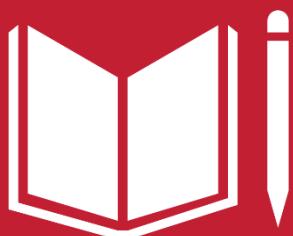

Quality Education

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

The Department of Cultural Relations at Alnoor University organized a workshop on the European Union's Erasmus+ scholarship programs, led by Assistant Professor Dr. Mohammed Zuhair Zaidan, Director of Cultural Relations at the University, and Lecturer Assistant Mohammed Nizar Aziz, Head of the Erasmus+ Unit. The workshop was attended by a number of students, faculty members, and administrative staff from various colleges and departments, and included a detailed presentation on Alnoor University's plan to enhance the participation of its students and staff in the EU scholarship programs and to take advantage of the educational and training opportunities available. It also discussed the latest version of the program, which is set to launch soon and offers a variety of opportunities for students, academics, and administrative personnel in the fields of training, academic exchange, and scientific research. The event reflects Alnoor University's commitment to expanding international cooperation and strengthening the capacities of its members through global programs that support higher education and research development.
