Sustainable Development Goals

Quality Education

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Alnoor University received a ministerial committee from the Ministry of Higher Education and Scientific Research with the aim of following up on the status of faculty members and reviewing the progress of the academic process at the university. During its visit, the committee conducted a field tour of several colleges and academic departments, met with faculty members, and reviewed the realities of academic work at the university. This visit comes as part of the Ministry's ongoing efforts to strengthen communication with universities and monitor the implementation of approved standards in academic institutions, contributing to the enhancement of the quality of higher education.
