Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

College of Health and Medical Technologies

The Department of Medical Laboratory Technologies at the College of Health and Medical Technologies at Alnoor University organized a workshop on the regulations and mechanisms of the graduation research project. The workshop was supervised and delivered by Lecturer Laith Yassin Qasim, a faculty member in the department, who discussed the nature of the graduation project, the challenges students may face during its implementation, and the steps required to successfully complete it. He also addressed the academic structure of the research report, the proper method of writing it, as well as research methodologies and the fundamental principles of preparing scientific reports for students.
