7 AFFORDABLE AND CLEAN ENERGY

Energy is a fundamental element in every challenge and opportunity the world faces today, whether it's creating jobs, securing safety, addressing climate change, producing food, or increasing income. Access to energy is essential for everyone, and working towards this goal is crucial as it is closely linked to other Sustainable Development Goals. To build more inclusive, sustainable, and resilient communities in relation to environmental issues such as climate change, it is vital to focus on providing universal access to energy, improving its efficiency, and utilizing renewable energy through the creation of new jobs and economic opportunities.
