13 CLIMATE ACTION

No country in the world is immune to the serious effects of climate change. Greenhouse gas emissions continue to rise and are now 50 percent higher than their levels in 1990. Moreover, global warming is causing long-term changes to our climate system, threatening irreversible consequences if we do not take necessary mitigation and adaptation actions today.

On its path toward developing its scientific landscape and strengthening its academic presence, Alnoor University continues to achieve advanced results across various local, regional, and international ranking cycles. The results of the 2025 Global Green Metrics ranking demonstrated notable progress for the University, as it ranked third among universities in Nineveh Governorate, eleventh among private colleges and universities in Iraq, twenty-fourth out of 87 Iraqi public and private universities and colleges, and 693rd globally, marking a clear leap compared to its results in the previous year's ranking.
