Sustainable Development Goals
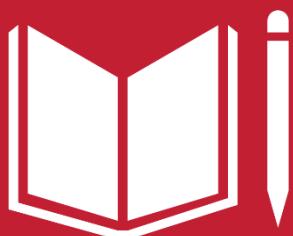

Quality Education

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Alnoor University has achieved a qualitative advancement and an important milestone in international, Arab, and local rankings, particularly in the Arab University Ranking for 2025, reaffirming its growing academic presence and distinguished position among Iraqi and Arab universities. The university ranked first among private universities in Nineveh Governorate and third among both public and private universities in the governorate. It also secured eighth place out of 32 Iraqi private universities and colleges, twenty-eighth out of 63 Iraqi public and private universities and colleges, and 143rd out of 236 Arab universities and colleges. This ranking is based on a set of approved indicators, including the quality of teaching and learning, scientific research, creativity, leadership and innovation, local and international cooperation, as well as community service. These results reflect Alnoor University's sustained efforts to develop its academic programs and enhance its educational and research environment, and represent the outcome of its strategic vision and continuous pursuit of academic excellence in line with higher education requirements, strengthening its position on the Arab higher education map.
