

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

Engineering Technical College

In the presence of Professor Dr. Kamil Ali Abdul Mohsen, Dean of the Engineering Technical College at Alnoor University, the college organized a specialized scientific workshop on information preservation and modern storage mechanisms. The workshop included a scientific and practical comparison between traditional storage units (Hard Disk Drives) and Flash Memory technologies, highlighting the advantages and disadvantages of each in terms of speed, storage capacity, cost, and lifespan, as well as outlining potential risks that may lead to data loss. It also reviewed the main technical causes of file loss, such as sudden failures, viruses, and misuse, in addition to presenting practical solutions to ensure data safety, including regular backups, the use of reliable protection systems, and relying on multiple storage media. The workshop was delivered by Assistant Lecturer Karam Samir Abdul Latif, who emphasized the importance of enhancing students' technical awareness regarding information security and data management due to its essential role in the engineering and technical work environment.
