Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

In the presence of the Assistant to the President of Alnoor University for Scientific Affairs and the deans of the Colleges of Pharmacy, Education, and Applied Arts, and as part of the series of scientific lectures aimed at promoting a culture of scientific research at Alnoor University, Professor Dr. Munir Salem Al-Badrani, the University's Scientific Advisor, delivered a hybrid (in-person and online) lecture entitled "The Identity of the Scientific Researcher." The lecture addressed the concept of research identity and its importance in building a well-established academic character, outlining the foundations upon which a researcher should base their scientific journey, including adherence to research ethics, ensuring originality and academic rigor, and building a reputable academic profile grounded in solid scholarly output. Professor Al-Badrani also highlighted the importance of publishing in peer-reviewed scientific journals, activating recognized academic profiles, and developing research skills in line with global advancements, emphasizing that a researcher's identity is not built on degrees alone, but on sustained and impactful scholarly contribution. The lecture was attended by a number of faculty members and researchers, with active online participation, and included interventions and questions that enriched the scientific dialogue and reinforced the lecture's objective of fostering a conscious research culture within the university.
