

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

College of Health and Medical Technologies

As part of Alnoor University's commitment to providing an integrated learning environment that enables students to explore their professional pathways at an early stage, and under the guidance of Assistant Professor Dr. Hadi Mohammed, Head of the Medical Laboratory Techniques Department at the College of Health and Medical Technologies, the department organized a field visit for a group of fourth-year students accompanied by several faculty members to Mosul Oncology and Nuclear Medicine Specialized Hospital. During the visit, students were introduced to the nature of laboratory work across the hospital's various departments, particularly specialized laboratories concerned with diagnostic oncology tests and nuclear medicine treatments, in addition to becoming familiar with advanced medical equipment and operational procedures aligned with contemporary medical standards. This visit forms part of the department's applied program aimed at integrating theoretical knowledge with practical training, thereby enhancing students' skills, strengthening their readiness to enter the job market after graduation, and reinforcing the concept of partnership between the academic institution and healthcare organizations in the province.
