

Sustainable Development Goals

No Poverty

1 NO POVERTY

Poverty is a condition attributed to individuals who are unable to meet their basic needs, which include all the essentials required for human survival and reflect the prevailing standard of living in society. Poverty impacts many aspects of life, leading to reduced levels of education, poor health, and inability to work. It also results in higher rates of vandalism and disorder within the community.

College of Dentistry

In the spirit of kindness and compassion during the holy month of Ramadan, the College of Dentistry at Alnoor University organized a field visit to the Orphanage in the Al-Zuhur area under the supervision of Professor Talal Hamid Al-Salman, Dean of the College. The delegation included four female faculty members along with 26 male and female students, who spent meaningful time with the children in an atmosphere of warmth and affection. The visit also included distributing a number of gifts to the children in a humanitarian initiative aimed at bringing joy and happiness to their hearts as they prepare to celebrate Eid Al-Fitr. This visit reflects Alnoor University's commitment to promoting the values of social solidarity among its students and strengthening the spirit of generosity and compassion during the holy month of Ramadan, contributing to community service and bringing happiness to orphaned children.
