

Sustainable Development Goals

Quality Education

4 QUALITY EDUCATION

Access to education can enhance quality of life and prepare future leaders who will find solutions to global challenges. Providing education to children in technical, vocational, and entrepreneurial skills will serve as a foundation for sustainable development through scholarships and educational facilities, as well as eliminating gender disparities in access to education.

Quality Education

College of Education

In the presence of Professor Dr. Yaseen Taha Al-Hajjar, President of Alnoor University, and Professor Dr. Khazal Fathi Zaidan, Dean of the College of Education, Alnoor University witnessed the convening of the graduation research discussion conference for students of the Department of Arabic Language in the College of Education, in a distinguished academic atmosphere and with the participation of the scientific committee and faculty members. The conference included the presentation and discussion of students' research in various fields within the specialization of Arabic language, reflecting the level of scientific preparation and academic rigor that the university has been keen to establish throughout their educational journey. This conference comes within Alnoor University's commitment to promoting scientific research, developing students' skills, and supporting their academic outputs in a way that contributes to preparing qualified scientific cadres capable of serving the community and the educational sector.

Quality Education

College of Engineering

The Department of Petroleum Engineering in the College of Engineering at Alnoor University organized a scientific seminar entitled “Leadership and Success” for its students, highlighting the importance of participating in the summer training programs organized by Mishwar Foundation for Training and Development within the Start Up Exchange Program, and the opportunities these programs provide for developing skills and enhancing students’ practical experience. The seminar was held in the presence of Professor Dr. Yaseen Taha Al-Hajjar, President of Alnoor University, under the supervision of Professor Dr. Saad Taan, Dean of the College of Engineering, and was moderated by Dr. Taha Hussein Ali, Head of the Department of Petroleum Engineering. The seminar emphasized the importance of developing students’ skills and linking academic knowledge with practical application in a way that contributes to preparing them for the labor market and supporting their future careers.

Quality Education

College of Health and Medical Technologies

As part of enhancing the practical aspect of education and linking academic knowledge with field practice, the College of Health and Medical Technologies at Alnoor University organized a scientific visit for students of the Radiology Techniques Department to the Research Hospital under the supervision of Professor Dr. Hanaa Ihsan Al-Baroudi, Head of the Radiology Techniques Department. The visit aimed to provide students with the opportunity to directly observe the medical work environment and learn about the latest devices and technologies used in the field of radiology, as well as to enhance their scientific and practical skills through interaction with specialized medical and technical staff. This visit comes within Alnoor University's commitment to developing its students' capabilities and preparing them academically and professionally in line with labor market requirements, contributing to the preparation of distinguished healthcare professionals capable of serving the community with high efficiency.

Quality Education

Professor Dr. Yaseen Taha Al-Hajjar, President of Alnoor University, inaugurated the mobile library that visited the university today, aiming to provide students with a diverse collection of scientific and cultural books in a step that reflects the university's commitment to supporting the educational environment and developing students' intellectual awareness. During the inauguration, the university president emphasized the importance of such initiatives in promoting a culture of reading and encouraging students to benefit from diverse knowledge resources beyond the scope of academic curricula. This initiative comes within the framework of supporting education and cultural enrichment, as the mobile library bus receives support from a German foundation specialized in education, while its management and supervision are carried out by a group of Iraqi professors and academics, ensuring the provision of solid scientific content that meets students' needs. In support of this initiative, the Central Library at Alnoor University contributed by donating a collection of books to the mobile library to enrich its knowledge resources and strengthen its role in spreading culture among students. Alnoor University also invites all its students to visit the mobile library and benefit from the valuable knowledge resources it offers, contributing to the development of their scientific and cultural skills.

Quality Education

College of Engineering

As part of its continuous efforts to develop the academic and personal skills of its students, the College of Engineering at Alnoor University organized a distinguished scientific and specialized debate that brought together elite students from the Department of Civil Engineering and the Department of Architectural Engineering. The debate began with a comprehensive introductory overview of both departments, after which the atmosphere of competition shifted into an intellectual and constructive exchange, where both teams presented logical arguments and evidence drawn from real-life and practical experience, in a refined academic setting reflecting the high level of students' awareness of their disciplines and their importance. The debate concluded in a positive and professional spirit, where perspectives converged and both teams affirmed a fundamental principle that engineering work is an “integrative process” between the two departments, each complementing the other, and both representing an essential pillar for advancing urban and societal development. This impactful event was organized by Assistant Lecturer Saad Saleh Diab under the direct supervision of the Dean of the College of Engineering, Dr. Saad Ali Al-Ta'an. Alnoor University continues its commitment to embracing and organizing such qualitative and extracurricular activities, believing in its essential role in building a well-rounded student personality and preparing graduates to become competent and influential leaders in the real field of work.

Quality Education

College of Education

The Department of English Language at the College of Education, Alnoor University, organized a conference for outstanding graduation research projects of fourth-year students, in the presence of Professor Dr. Khazal Fathi Zaidan, Dean of the College of Education, and Professor Dr. Shuayb Saeed Abdul Fattah, Head of the Department of English Language, along with a number of supervising professors. The conference featured the participation of 12 scientific research papers in the field of English language and literature, which were discussed by a specialized scientific committee, reflecting the distinguished academic level of the department's students and their commitment to producing rigorous research work. At the conclusion of the conference, certificates of appreciation were distributed to the participating students in recognition of their scientific efforts and to encourage them to continue their academic journey. This conference comes within Alnoor University's support for scientific activities and its commitment to enhancing students' research skills in a way that contributes to the development of their academic and practical capabilities.

Quality Education

Alnoor University received the Head and members of the Compliance Committee affiliated with the Supervision and Evaluation Authority in an official visit aimed at assessing the university's compliance with ministerial standards related to accreditation, quality assurance, laboratory quality, infrastructure, and the provision of university environment requirements. This visit came within the framework of enhancing quality standards and advancing the academic and administrative level, as the delegation reviewed the facilities and capabilities available at the university and the extent of their compliance with the standards approved by the Ministry of Higher Education. The delegation consisted of a group of specialists representing the Ministry of Higher Education, who praised the efforts made by Alnoor University in developing its educational environment and fulfilling quality requirements. Alnoor University reaffirmed its continuous commitment to adhering to ministerial standards and working toward the development of its infrastructure and academic performance in a way that achieves the highest educational standards for its students.

Quality Education

Professor Dr. Yaseen Taha Al-Hajjar, President of Alnoor University, received the specialized ministerial committee assigned to audit the master sheet records related to the final examinations for the 2024–2025 academic year, as part of the efforts of the Ministry of Higher Education and Scientific Research to monitor the integrity of examination procedures in private universities and colleges. The committee included a number of specialists from the ministry's departments, who conducted field visits to the university's relevant divisions and reviewed the mechanisms for organizing examination records, as well as the adopted auditing and archiving procedures, in a manner that ensures accuracy, transparency, and the protection of students' rights in accordance with the applicable ministerial regulations. During the visit, Alnoor University reaffirmed its commitment to full compliance with the instructions issued by the Ministry of Higher Education and Scientific Research and to adopting the highest standards of organization and accuracy in managing examination records, reflecting the level of academic and administrative rigor pursued by the university across its various sectors. This visit comes within the framework of the continuous follow-up carried out by the Ministry of Higher Education and Scientific Research for private universities and colleges with the aim of enhancing the quality of academic performance, ensuring the integrity of examination procedures, and documenting results according to officially approved regulations.

Quality Education

Alnoor University honored its students who participated in the Scout Challenge and Creativity Competition after achieving eighth place among Iraqi universities. The recognition took place during a reception hosted by Yaseen Taha Al-Hajjar, President of the University, in the presence of the officials of the scouting, artistic, and cultural divisions within the Department of Student Activities. During the visit, the team presented the Shield of Achievement to the University President in appreciation of his continuous support for student activities and his encouragement of students to participate in university events and competitions. The University President emphasized the importance of extracurricular activities in developing students' abilities and enhancing the spirit of cooperation and teamwork, praising the efforts exerted by the participating team and the honorable achievement they accomplished for the university. At the conclusion of the meeting, the participating students were awarded certificates of appreciation in recognition of their efforts, with wishes for their continued success and excellence.

Quality Education

The Ministry of Higher Education and Scientific Research / Supervision and Scientific Evaluation Authority announced the issuance of a ministerial order granting programmatic accreditation to the Bachelor's Program in the Department of English Language at the College of Education, Alnoor University. This achievement comes as a confirmation of Alnoor University's commitment to quality standards and academic accreditation, as well as its continuous efforts to develop its academic programs and enhance the educational and academic level in line with the requirements of the Ministry of Higher Education and the national accreditation standards. The Presidency of Alnoor University reaffirmed its continued support for colleges and scientific departments in achieving further academic and institutional successes in a way that strengthens the university's position within higher education in Iraq.

في الحصول على الاعتماد التربوي لبرنامج قسم اللغة الإنكليزية في كلية التربية بجامعة النور.

Quality Education

Alnoor University honored the teaching assistants of the College of Pharmacy and the teaching assistants of the College of Health and Medical Technologies and its departments for the 2025–2026 academic year in appreciation of their sincere efforts, effective role in supporting the educational and administrative process, and their continuous contribution to serving students and enhancing the quality of academic performance within the colleges. The honoring ceremony was attended by the Dean of the College of Health and Medical Technologies, Professor Dr. Yassar Yahya Hussein, and Assistant Professor Dr. Omar Qutaiba Al-Layla, Dean of the College of Pharmacy. This recognition came in appreciation of the commitment and high sense of responsibility demonstrated by the teaching assistants in performing their duties and supporting the educational process, reflecting a spirit of cooperation and institutional belonging. Alnoor University reaffirmed its continuous commitment to supporting young academic talents and appreciating their efforts in a manner that contributes to developing the university environment and advancing the level of scientific and administrative performance.

Quality Education

Alnoor University participated in the activities of the Second International Conference on Physical Education and Sports Sciences organized by the University of Halabja, which witnessed broad participation from researchers, academics, and Arab and international experts specializing in the fields of physical education and sports sciences. Representing Alnoor University at the conference were Professor Dr. Yaseen Taha Al-Hajjar, President of Alnoor University, and Professor Dr. Nazim Shaker Al-Wattar, Head of the Department of Physical Education and Sports Sciences. This participation reflected the university's commitment to strengthening its academic and scientific presence in international forums and benefiting from modern scientific expertise and experiences. The conference featured a number of scientific research presentations, panel discussions, and workshops addressing contemporary topics in sports sciences, sports psychology, training, and physical education, in addition to discussing prospects for joint scientific cooperation among participating universities and institutions.

Quality Education

As part of the celebrations marking Iraqi Engineer's Day, organized by the Iraqi Engineers Association / Nineveh Branch in academic partnership with Alnoor University, the top engineering students from the engineering colleges of Nineveh's universities were honored in recognition of their academic excellence and outstanding achievements, as they represent the generation that will carry the responsibility of reconstruction, development, and shaping Iraq's future. The recognition included the highest-ranking students from the engineering colleges of the University of Mosul, Nineveh University, Northern Technical University, Alnoor University, and Al-Hadbaa University, in a celebratory atmosphere that reflected pride in the capabilities of young engineering talents and their distinguished scientific accomplishments. This initiative emphasized the importance of supporting outstanding students and encouraging them to continue their path of creativity and success, as they constitute a fundamental pillar for the future of engineering and sustainable development in Iraq. The event also reflected the spirit of academic cooperation between educational and professional institutions in Nineveh Governorate. Furthermore, the Iraqi Engineers Association / Nineveh Branch honored Alnoor University as the academic partner of the celebration in appreciation of its role in supporting scientific and professional activities, contributing to the success of Iraqi Engineer's Day events, and strengthening academic collaboration in a manner that serves and empowers young engineering talents in Nineveh. This recognition stands as a tribute to academic excellence and a message of appreciation to every student who worked diligently and persevered to become a promising model of the future Iraqi engineer.

Quality Education

Alnoor University has been awarded a Certificate of Appreciation by the organizing committee of the 30th International Conference “Young Sports Science of Ukraine,” held in the city of Lviv, Ukraine, in recognition of its active contribution to the conference’s scientific and organizing committees through the participation of the Department of Physical Education and Sports Sciences. This recognition reflects the university’s distinguished academic and scientific presence and its effective role in promoting international cooperation and the exchange of expertise in the fields of sports sciences and physical education. It also underscores Alnoor University’s commitment to strengthening its academic engagement in international forums and contributing to the advancement of scientific research and sports-related disciplines at the global level.
